Art Unit: 1712

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

2. (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
3. Claims 1-9, 11-12 and 14-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Waggoner (5,813,607).

Waggoner relates to a label form comprising a backing member (12) with release coating on both surfaces, an opaque member (14) can be a label removable attached to one side of the backing member and a transparent film (10) can be a laminate removably attached to a second side of the backing member. The label can be printable. As shown in the drawings, the die-cut lines provide for the split-line to form a first and second section. The label and the transparent laminate straddles said split-line. Further, because the size of each section is different, the label and the laminate are adhered to different sections. The transparent laminate is polyester, which is plastic (col. 3, lines 59-16). The transparent laminate is larger than the opaque label (col.4, lines 41-45).

The reference also teaches a method of applying a label to a surface comprising removing the label and applying to the transparent laminate, and then applying to a surface label as a single label.

The intended use phrases such as "adapted for" etc. have not been given patentable weight as said phrases are not deemed to be positive limitations.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Waggoner.

Waggoner, as discussed above, fails to teach that the transparent laminate is 0.25 inches wider than the label. It would have been obvious matter of design choice to modify Waggoner by providing a transparent film to be 0.25 inch wider than the label based on optimization through routine experimentation to provide protective surface to the label.

Further, locating the label and transparent film on the same side of the backing member would have been obvious to ordinary skill in the art based on rearrangement of parts.
